

**SPECIFICATIONS****ARTICLE**Designation : **ECO corded detectable ear plugs**Code bobet : **21335**Selling Unit : **pair**Customs Code : **0****CHARACTERISTICS**

Contamination by foreign bodies is a constant risk in all food industries.

The ECO detectable ear plug helps to solve this problem because it is detected by all standard metal detectors.

- Polyurethane foam plugs
- Colour : blue
- Perfectly fits the auditory meatus
- Excellent attenuation of noise SNR 36dB
- Connected by a blue PVC cord
- Detectable brass ball
- Comfort
- Disposable

**APPLICATIONS :**

Noisy industrial environments, noisy sports and leisure, prolonged use...

**ATTENUATION VALUES :**

- SNR = 36dB, H = 36dB, M = 33dB et L = 32dB

SNR = Attenuation Global Index (Single Number Rating) (value that is subtracted from the C-weighted noise level, L (C), to estimate the actual A-weighted noise level into the ear)

H = High frequency attenuation value (value representing the expected attenuation of noise level with LC-LA = -2dB)

M = Medium frequency attenuation value (value representing the expected attenuation of noise level with LC-LA = +2 dB)

L = Low frequency attenuation value (value representing the expected attenuation of noise level with LC-LA = 10 dB)

**PACKAGING :**

Box of 150 pairs

**STANDARDS :**

In compliance with the PPE model which has been the subject of the EC type examination certificate n°CEC40063 delivered by SAI GLOBAL (organism n°2056)  
In compliance with the standard EN 352-2:2002
